Company

Aesir Interactive GmbH is a Munich-based game development studio established over 11 years ago. With a team of 120 skilled professionals, the company specialises in creating system-driven, open-world games using the Unreal Engine. Aesir Interactive is renowned for its success with "Police Simulator" and is set to release its upcoming titles, "Ambulance Life" and "Windstorm 3: Legend of Khiimori." In 2024, the studio launched "Windstorm Remastered" for Xbox Series S/X, PlayStation 5, and PC, demonstrating its expertise in high-quality, cross-platform development.

Products and technologies

Aesir Interactive excels in producing open-world games and system-driven experiences using the Unreal Engine 5. Their development approach combines cutting-edge technology with a strong focus on storytelling and engaging gameplay. The company's projects span multiple platforms, including PC, PlayStation, and Xbox, ensuring a broad reach and appeal. Aesir Interactive's proficiency with Unreal Engine enables the creation of immersive environments and seamless gameplay mechanics tailored to each game's unique narrative and objectives.

Strengths

Aesir Interactive's key offerings include:

- Expertise in developing open-world and system-driven games.
A diverse and highly skilled team of 120 professionals working on multiple concurrent projects.
- A proven track record of delivering successful titles across various platforms.
- Strong capability to manage large-scale productions and meet the expectations of global publishers.
- High adaptability to new challenges and dedication to leveraging state-of-the-art technology, such as Unreal Engine 5.
