## Company

Biofidus is a contract research organization (CRO) founded to provide fast and reliable solutions to the most complex bioanalytical challenges. Our portfolio includes a broad range of customized bioanalytical services that enable detailed structural and functional characterization of biologics as well as cell and gene therapeutics. Our experts have over 40 years of bioanalytical experience in mass spectrometry, chromatography, sequencing, and cell-based assays. Our attention to detail and quality allows us to find the solution for your bioanalytical project.

## Products and technologies

Mass Spectrometry, Chromatography, Capillary electrophoresis, Surface Plasmon Resonance, (NGS)-Oxford Nanopore Sequencing, Cell-based assays

## Most popular analytical services:

Biosimilar studies, Developability studies, Primary structure characterization, Impurity analysis, Amino acid modification analysis, Glycosylation analysis, Aggregation analysis, Charge heterogeneity analysis, mRNA analysis, Vector characterization, SPR analysis, Bioactivity studies, Higher order structure determination, Nucleotide analysis, Spent media analysis

## Strengths

- Competitive pricing
- Fast and flexible service
- Up- & Downstream analysis
- Single point of contact
- Holistic portfolio (studies)
- Client specific research teams

## Target clients

- Contract manufacturing organizations (CMOs)
- Biosimilar developer
- New biological entity (NBE) developer
- Pharma and biotechnology corporates and start-ups
- Research organizations
- Consultants for CMC
