

GMP cleaning systems

MBL specialises in GMP container or small parts cleaning systems tailored to your exact requirements.

Material handling

MBL offers a wide range of solutions for handling different materials, from crusher systems to conveyor technology.

Stationary lifting systems

MBL's stationary lifting systems are particularly suitable for handling heavy loads.

Process solutions

MBL increases your process efficiency and safety by providing material handling solutions for conveying, sieving and weighing tasks.

Mobile lifter

MBL offers you manually operated to electrically driven lifting systems with customised frontends.

Blending systems

MBL provides various systems to blend your powders and granules safely and evenly.

IBCs / containers & drums

MBL provides custom-fit containers and drums that meet the demanding requirements of e.g. the pharmaceutical industry.

Company

MBL, a brand of BSW Anlagenbau GmbH, stands with its name (Material handling, Blending, Lifting systems) for system solutions of process-accompanying equipment to make your processes safer and more efficient. We design individual handling systems according to your needs for the fields of blending, weighing, dispensing, sieving, lifting and conveying. Our portfolio is rounded off by GMP cleaning solutions.

MBL

Our customers appreciate our more than 20 years of experience and flexibility as a system provider as well as our own production, including metal and sheet metal processing. Customised solutions from a single source, customer proximity and “Made in Germany” are our successfully practiced guiding principles.

Products and technologies

System solutions of process-accompanying equipment e.g.: IBC Washing Systems & Pharmaceutical Small Parts, Lifting Systems, mobile Lifter, Weighing/Dispensing, Engineering, Mixer/Blender/Tilter, Documentation, GMP, Container, Clean Room, Validation, Made in Germany, Material Handling, Process Solution.

Strengths

Wide range of products in the field of customised handling systems for blending, weighing, dispensing, sieving, lifting, conveying and GMP-cleaning solutions. System supplier, Made in Germany, family-run company, more than 20 years of experience.

Target clients

Our target clients cover a wide range of key roles within the pharmaceutical, fine chemical and biotechnology industries, including production managers, technical managers, engineering managers, plant managers, R&D managers, procurement managers and process managers. We understand the unique needs and responsibilities of each role and tailor our products and services to meet their specific requirements.
