

ION Analyzer

Ion chromatographs suitable for the analysis of anions and cations

WATER Purification

The Ideal Water Purification Systems for your laboratory

AMINO ACID Analyzer

Precise Amino Acid Analyzers for the use in clinical laboratories

TOC Analyzer

The right TOC Analyzers from Water to Ultra Pure Water applications

Experts in laboratory equipment for 30 years

Company

We have been in the water purification business since 1993. The water purification systems and related analyzers we produce have been subject to continual development for nearly a quarter of a century. We are one of the top players in our core markets of water purification, TOC measurement, amino acid analysis and ion chromatography, offering an outstanding level of technology and quality such as EDI, post column derivatization with Ninhydrin and NDIR TOC detection.

Products and technologies

Water Purification Systems for Lab demands, TOC analyzer (online) for semi conducting and pharmaceutical application #WaterforInjection, Amino acid analyzer for Food, feed, Research, clinical application, Ion chromatograph for standard applications in environmental and research sector.

Strengths

We deliver value for money. A german made system with all needed features priced lower than European or American competitors. Thanks to our medium-sized structures, our internal paths are very short and we can respond quickly to enquiries and costumer demands.

Target clients

Distributors, working in the lab equipment sector or supplier to pharma and semiconductor industry.
