METALUX[®]
SURFACETREATMENT

Company

A well-established medium-sized company with a rich history spanning over four decades in the field of surface treatment technology. Our extensive experience has endowed us with profound industry knowledge across diverse sectors, and we pride ourselves on being a beacon of innovation and excellence in finishing programs. As a strategic partner to our clients, we offer invaluable support from the initial design phase. This proactive approach enables us to pinpoint opportunities for cost savings and recommend the most suitable finishing solutions for each component. Our collaborative efforts are geared towards not only meeting but exceeding our clients' expectations, ensuring the utmost efficiency and performance of their products.

Products and technologies

We want to achieve the optimum refinement for your components. The nature and properties of materials have a considerable influence on the result. For example, undercuts, non-vented cavities, threads or bores have surfaces that are difficult to degrease, clean, rinse and coat. We will be happy to advise you in advance on what you should watch out for – and which is the optimal process for your project. We then carefully select the right technology for your components from our extensive range of racks.

Strengths

1. Cutting-Edge Inhouse Laboratory Expertise
2. REACH Compliance
3. Forward-Looking Investment (TSA, Tartaric Sulphuric Acid Anodizing; BSA, Boric Sulphuric Acid Anodizing; and advanced coating processes)
4. Comprehensive NDT Expertise

In summary, our company's dedication to quality, compliance, sustainability, and continuous innovation makes us an outstanding choice for potential business partners in the aerospace industry. Partnering with us means gaining access to cutting-edge capabilities and a commitment to excellence that can significantly enhance your business operations.

Outcome of the Mission

Introductions to key industry players, decision-makers, and potential clients or partners would be greatly beneficial. Our participation in this mission is driven by the expectation of expanding our market presence, forging strategic partnerships, enhancing visibility, gaining market insights, and ultimately driving business growth in the US.
