

Coneva: optimizing decentralized energy assets

Profile:

Coneva develops digital energy services that ensure green energy every day -an energy community of companies, prosumers and consumers who can analyze and share their energy -thus creating a better energy future.

Its unique energy software-as-a-service platform optimizes decentralized energy assets to maximize cost savings and realize additional value through local optimization and energy market integration.

Services

Holistic, sector-coupled approach for consumers and prosumers.

AI-& forecast-based management of battery systems.

Cross-sectoral, including powerful electric vehicle charging support.

Integration into smart grids and markets.

Dynamic load management.

Target:

EV charging parks operators.

Providers of electric vehicle fleet charging solutions.

Charging solutions manufacturers.

Municipalities.
