

## Lenord+Bauer: specialist in sensors for motor feedback for electric traction drives

W: [www.lenord.de](http://www.lenord.de) R: UlrichMarl, Key Account Manager E: [umarl@lenord.de](mailto:umarl@lenord.de) T: 0049 151 1127 0055

## Profile:

Lenord+ Bauer is specialist in sensors for motor feedback with more than 30 years experience with a focus on electric traction drives for railways and vehicles for both the on and off-road market.

For all types of motors, such as inductive asynchronous or permanent magnet machines, Lenord+ Bauer provides reliable, high resolution and accurate sensor solution based on magnetic or inductive technology.

Lenord+ Bauer can provide fully functional custom prototype sensors.

## USP

Extensive experience of sensor technologies in traction drives.

Own R&D and test laboratory.

Own production facilities.

## Target:

E-vehicles Manufacturers both established and startups.

Relevant organisations.

APCUK.

Universities.
