Pracht: charging two cars at once
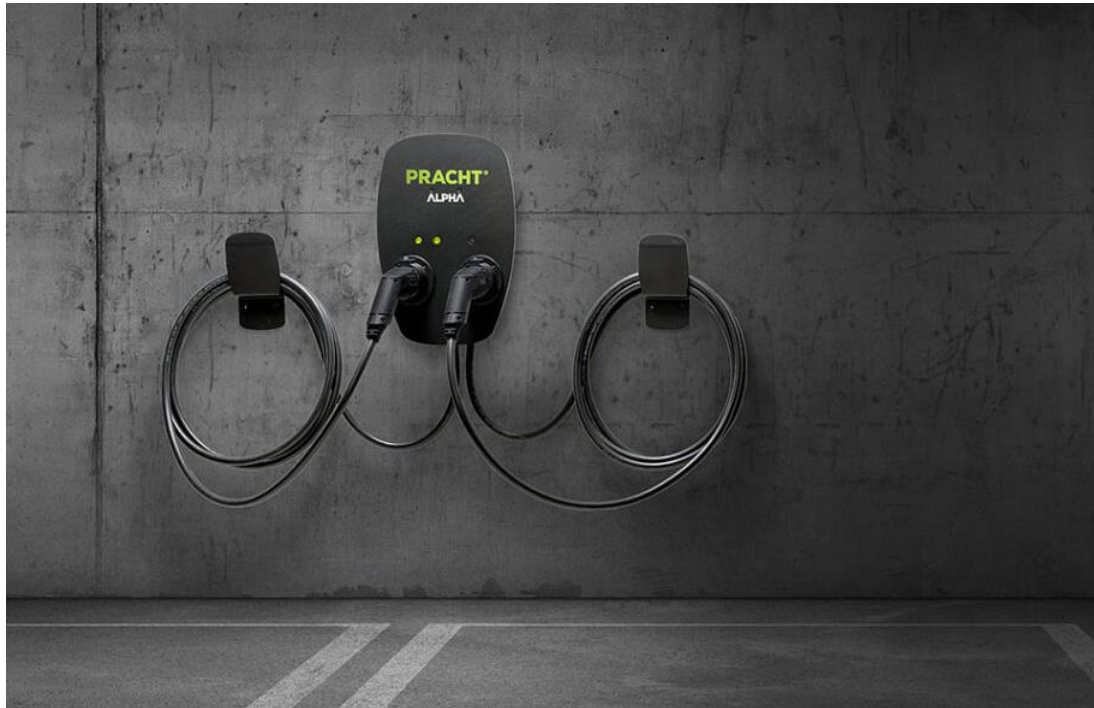

Profile:

Sustainable and responsible thinking and acting are an integral part of the company philosophy.

PRACHT offers a wide range of sustainable, innovative solutions for EV charging.

The ALPHA Wallbox is able to charge two cars at once with 11kV or one with 22kV

The ALPHA is prepared for all possible infrastructures on site and can be integrated in every household and company.

Thanks to this intelligent design, ALPHA is extremely easy to install, any electrician can do it without additional certificate or training.

USP

Long experience in technology and engineering.

PRACHT stands for high quality, special applications and innovation power Made and Re-Made in Germany.

PRACHT has its own plastic fabrication on site and therefore the power and knowledge to develop future proof and sustainable materials f. e. plastic from 100% recycled plastic waste.

Target:

Charging point installers.
