

## Wickeder: developing and engineering clad materials

 **Wickeder  
Westfalenstahl**  
Wickeder Group

## Profile:

Wickeder Westfalenstahl GmbH headquartered in Wickede (Ruhr) is the parent company of the Wickeder Group and manufacturer of clad materials.

We develop and engineer materials for customer requirements in our in-house tech center.

We use our knowledge in materials science and advise comprehensively the best material grade or clad combination for diverse applications in consumer, electro, energy, E-mobility, smart grid, H2, batteries.

We work as a team with our customers starting with an idea, first prototype, during industrialization up to scaled mass production.

Furthermore, Wickeder Westfalenstahl has partnerships with leading analytical laboratories and institutes to provide best reporting.

We can offer mass production in our worldwide –organized production facilities (EU, US, PRC).

Our engagement is in sustainable climate protection, e.g., by saving material resources by increasing performance of the materials, increasing efficiency of applications or simply by planning and realizing so-called green loops to give scraps a second life or direct re-use it for new production.

## USP

Global footprint, sustainability, efficiency, offering 1 prototype as well as mass production worldwide.

## Target:

E-vehicles Manufacturers both established and startups.

Battery Manufacturers.

Relevant Institutions and Organisations.
