Company

Waldner was originally founded in 1908 as a small metal working company. Today our Group of companies consists of several individual companies, whereas we approach our customers and the relevant markets via our four business units: Business unit Lab Space Solutions, Business unit Process & Automation Solutions, Business unit Filling, Sealing & Packaging Machines and Business unit Education.

Products and technologies

- **Waldner Lab Space Solutions** is the solution provider for everything to do with laboratories: from consulting, planning and project management of turnkey solutions to complete room furnishings including life-long maintenance.
- **Waldner Process & Automation solutions** supplies tailor-made process technology for the pharmaceutical and food industry. These include highly complex systems for drug production, isolators, pressure vessels, reactors & fermenters as well as drying systems and cooking plants.
- **Waldner Filling, Sealing & Packaging Machines** develops and manufactures fully automatic Dosomat filling and sealing machines and the corresponding packaging systems. The machines are used worldwide - in the food, delicatessen, beverage, cosmetics and pharmaceutical industries.
- **Waldner Education** supplies innovative furnishing systems for general, scientific and vocational learning spaces: furniture, visual equipment, media supply and fume hoods.

Strengths

Waldner complies with international pharmaceutical industry standards such as cGMP guidelines and FDA standards. We are ISO 9001:2015 certified and are approved to manufacture pressure vessels in accordance with PED 2014/68/EU and ASME licensing regulations. The following product groups are part of our scope of delivery for the pharmaceutical industry: Automation solutions, Vessels, skids and systems, Isolators and containments, Drying technology, Container.

In the Business Unit Waldner Lab Space and Solutions Waldner complies with all European standards, e.g. EN 14175, and provides products like fume cupboards, service distribution systems and lab furniture in general.

Target clients

Pharmaceutical companies, CMO's, CDMO's, universities, chemical industry, food and other industries.
